Skills

Languages: C++, C, Python, JavaScript, HTML, CSS, SQL, PowerShell, Power Fx

Tools: Git, GitHub, Jira, Docker, MySQL, SQLite, Jupyter, Wireshark, Autopsy, The Sleuth Kit, FTK Imager, Ncat

Frameworks & Libraries: React, Tailwind CSS, NumPy, pandas, Matplotlib, scikit-learn

Experience

TEBS Intern, Montgomery County Government (Maryland) – Rockville, MD June 2026 – Aug 2026

- Engineered a Power Apps inventory solution for the Office of the County Executive using Power Fx and Dataverse, delivering search, filtering, sorting, CRUD functionality, and interactive inventory metrics; automated workflows and customized HTML email notifications with Power Automate.
- Managed GitHub Copilot pilot program by analyzing CSV and NDJSON usage data to calculate adoption metrics and presenting findings to pilot participants and TEBS leadership.
- Supported enterprise application operations by troubleshooting KnowledgeLake authentication and document-processing issues, categorizing unresolved batches for resolution, and migrating SAP Crystal Reports folders between servers with SQL-based environment validation.

AIM Data Specialist, ARC Document Solutions – Columbia, MD June 2025 – Aug 2025

- Performed high-volume data validation and quality assurance on scanned police reports and document repositories, identifying image and data-quality issues for government and professional sports clients.
- Configured and imaged Windows workstations with standardized system builds, required software, and configurations for a large-scale digitization project.

AV Student Specialist I, UMBC DoIT - AV Operations – Catonsville, MD May 2024 – Dec 2024

- Provided technical support for classroom and office AV/conferencing systems, troubleshooting projectors, control panels, and related endpoints across campus.
- Resolved incidents through RT help desk tickets, phone support, and walk-ins; assisted with digital signage replacements and earned the AVIXA AV Technologist certificate.

Projects

Network Security Capstone (In-progress)

- Building a multi-phase enterprise network security testbed (DMZ, PKI, firewalls, VPNs, Kerberos) using Docker and iptables to simulate real-world attacks and defenses.
- Implemented and mitigated MITM attacks (ARP poisoning, ICMP redirect) on a Dockerized multi-LAN network, validating results via Wireshark/tcpdump.

Sports Tracker Web App

[GitHub Repository](#)

- Collaborated in a Scrum team to build a full-stack soccer statistics application, integrating APIs, version control, sprint planning with Jira, and responsive accessible UI design.

Homelab

- Deployed a Proxmox VE hypervisor running VMs/LXC containers (Debian, Kali) for self-hosted services (AdGuard, Immich) and DFIR practice; configured Tailscale for secure remote access to homelab infrastructure.

Education

University of Maryland, Baltimore County – BS in Computer Science

May 2027

Relevant Coursework: *Network Security, Applied AI in Cybersecurity, Software Engineering, Computer Networks, Database Management Systems, Operating Systems*

Certifications: *CompTIA Security+ (In-progress)*

Extracurricular: *CyberDawgs (Cybersecurity), UMBC SAD Club (System Administration and Software Development)*
